Game Changers that could
Change the World

7% CO₂ emission
Top source of NO_x pollution

2-3% Y-o-Y increasing
transport cost due to
driver's shortage and fossil
fuel cost

0% of carriers can
provide sustainable and
cost-efficient freight today

The challenge

Going electric and autonomous requires centralised transport management to make it cost-competitive and sustainable...

The challenge

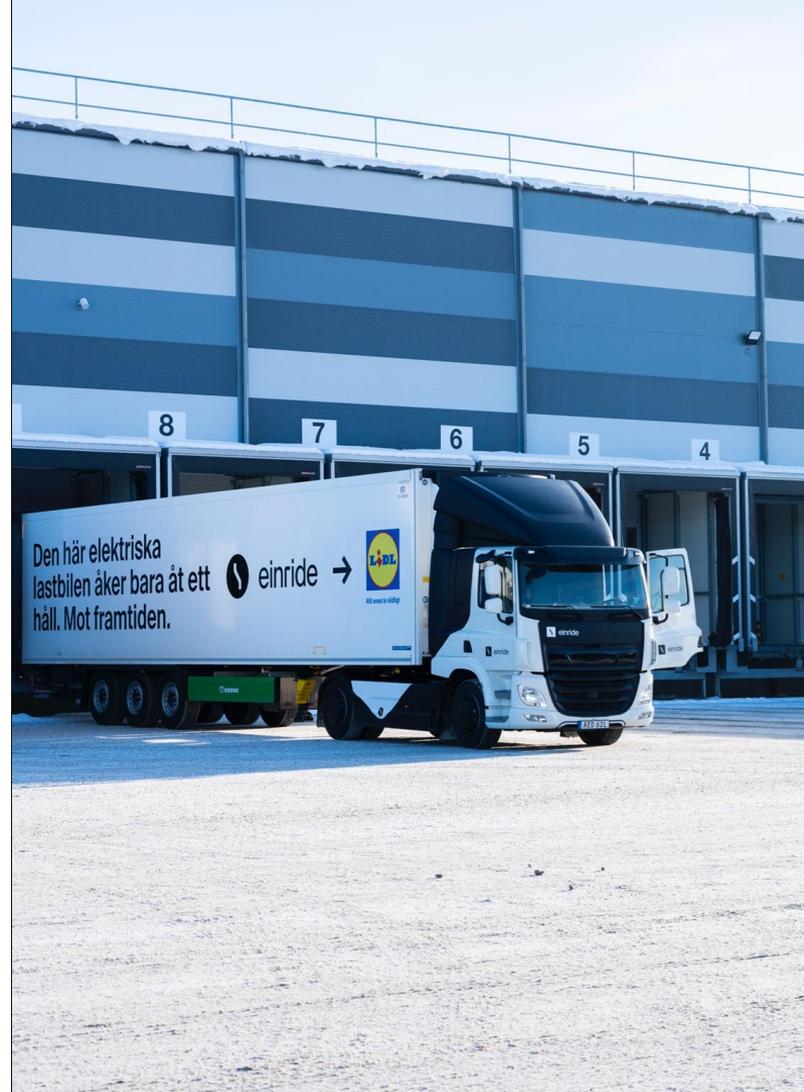

... and electric and autonomous freight are hard to access in today's market

The solution

A freight mobility platform that makes it possible to go electric and autonomous today.

Live in operation with the largest electric fleet of heavy-duty vehicles in Europe.

And our customers...

...have committed to scale
