How we responded to clients' needs

Scope & cost predictability

We help to delivery business ideas on time, with enterprise quality, in budget.

Low risk & verified Partner

Proven track record in providing services from SME to corporate for 13 years.

Flexible/agile/ scalable Partner

We tune our process of software delivery to match your company structure.

Additional knowledge and competences

Narrow technology but wide domain specialization.

Project Outsourcing

How do we work

- **Dedicated Development Team,** supervised by Delivery Manager.

- Work based on Agile model, with **Clients' Product Owner** responsible for project scope and j-labs responsible for tasks within iteration.

- j-labs **Delivery Manager** is responsible for meeting business requirements and quality of delivered products.
