**The Future of Fulfilment Operations:**

**Why Flexible & Scalable Warehouse Automation is the Key  
to Success**

Julian Hafner – Senior Director, Global BD

# Contents

- 3 | Why Flexible & Scalable Automation Solutions?
- 4 | Core Advantages & Key Strengths

The rise of e-commerce has highlighted the need for **flexible and scalable** warehouse automation solutions.

# The Rise of E-Commerce

## Rising Customer Expectations

28% of German customers expect same-day delivery for their online orders (Bevh, 2021).

## Omni-Channel Fulfilment

Approximately 23% of German online shoppers have used the buy-online-pickup-in-store (BOPIS) service (Bevh, 2021).

## B2B & B2C mixed operations

Around 90% of German B2B companies engage in online sales (ibi research, 2021).

- 1 | What's Impacting Fulfilment Operations?
- 2 | Traditional Fulfilment Challenges
- 3 | Why Flexible & Scalable Automation Solutions?
- 4 | Core Advantages & Key Strengths

# Traditional Fulfilment Challenges

## Labour Shortage

Around 50% of companies in Germany faced difficulties finding qualified employees (German Chamber of Commerce and Industry DIHK 2019).

## Limited Warehouse Capacity

Growth in prime rents in EU increased by 10.4% in the last four quarters. This is despite vacancy creeping up to 3.5% in Q1 2023 (Savills).

## Order picking accuracy

Order picking accuracy is challenged by human error, high volume of orders, system inaccuracies, inadequate training, and complexity of orders.

## Inventory Management

Maintaining optimal stock levels to prevent overstocking or stockouts is challenging, especially with variable demand.

Established in 2016, HAI ROBOTICS is committed to providing flexible, intelligent and efficient warehouse automation solutions through advanced robotics technology. We aim to empower every warehouse and factory with logistic robots. The solution has been applied in apparel, 3PL, retails, e-commerce, electronics, energy, manufacturing, healthcare, and other industries.

# Think Globally. Act Locally.

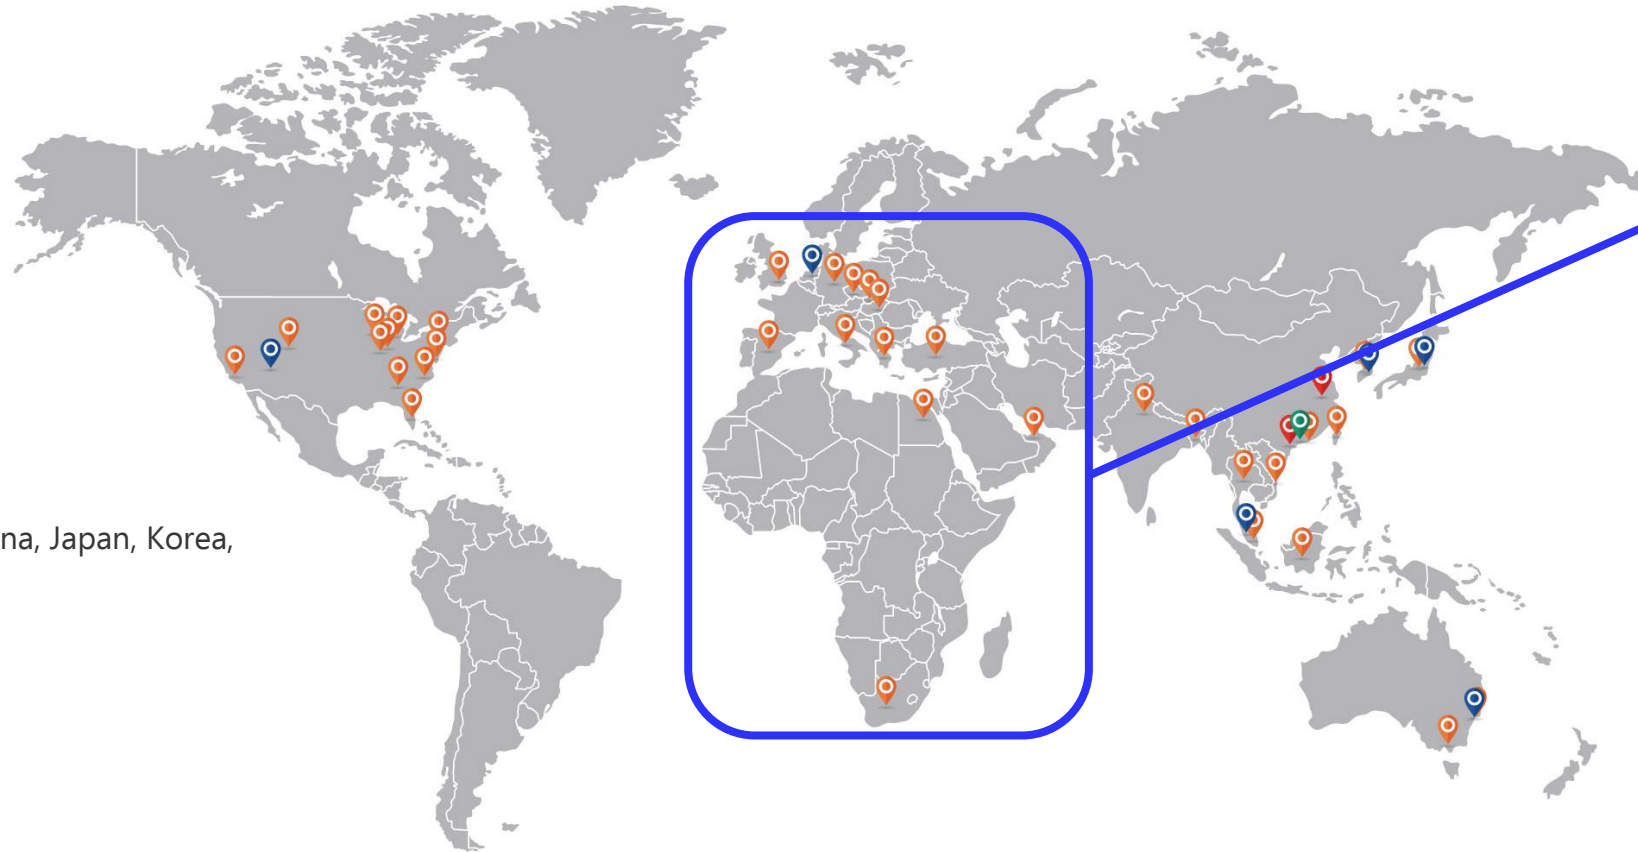

Shenzhen, CN  
Global Headquarters

Dongguan & Wuxi, CN  
Factory for 20.000 robots p.a.

20+ offices in US, Europe, China, Japan, Korea, Taiwan, SEA, Australia  
Worldwide Locations

# We Provide Flexible & Scalable Warehouse Automation Solutions

## One-Stop-Shop

Through HAI &  
Local  
Suppliers

- HaiPick robots
- Chargers
- Workstations/HaiPort
- Conveyors
- Storage systems
- Totes
- Software interface

Through Our  
System  
Integrators

- Sorter: Cross-belt, Tilt-tray, Pouch, etc.
- Carton erector
- Lid applicator
- Box-on-demand automation
- And many more...

# ACR Systems - Flexible & Scalable

## Automation

Autonomous Case-handling Robot (ACR) systems are highly efficient [Goods-to-Person solutions](#) designed for totes & cartons transportation and process optimization.

HaiQ Software Platform

HaiStation

HaiCharger

Storage Unit

HaiPick Robots

# HaiPick Systems

## HAIPICK SYSTEM 1

The most **flexible** goods-to-person automation solution

- Most flexible ACR solution, handling various storage unit sizes
- Handles inbound and outbound operations
- Integrates directly with conveyor-based workstations
- Adding HaiPort docking stations supercharges HaiPick efficiency

## HAIPICK SYSTEM 2

The most **versatile** goods-to-person automation solution

- All HaiPick System 1 advantages
- ACR & AMR integration (600 – 1000 KG)
- ACR for tote handling while AMR for pallet/cages/hanging garment rack handling
- Enables order consolidation

## HAIPICK SYSTEM 3

The most **powerful** goods-to-person automation solution

- ACR & AMR integration
- Fastest AMR in the industry at 4 m/s
- Max. performance density: 1.5 cases/h/m<sup>2</sup>
- Significantly increase storage density above 50 totes/m<sup>2</sup>
- Intelligent robot path & order scheduling for 1000+ robots simultaneously

What's Impacting Fulfilment Operations?

2

Traditional Fulfilment Challenges

3

Why Flexible & Scalable Automation Solutions?

4

Core Advantages & Key Strengths

# Core Advantages

## Rapid Deployment

Easy to transform and upgrade  
6-9 months after PO

## Third-Party Usability

Suitable for a variety of application scenarios, handling various SKUs

## High ROI

Significantly shortens the return period of investment to 2-3 years

## Increased Operational Efficiency

Intelligent picking and handling increases efficiency by 3-4x

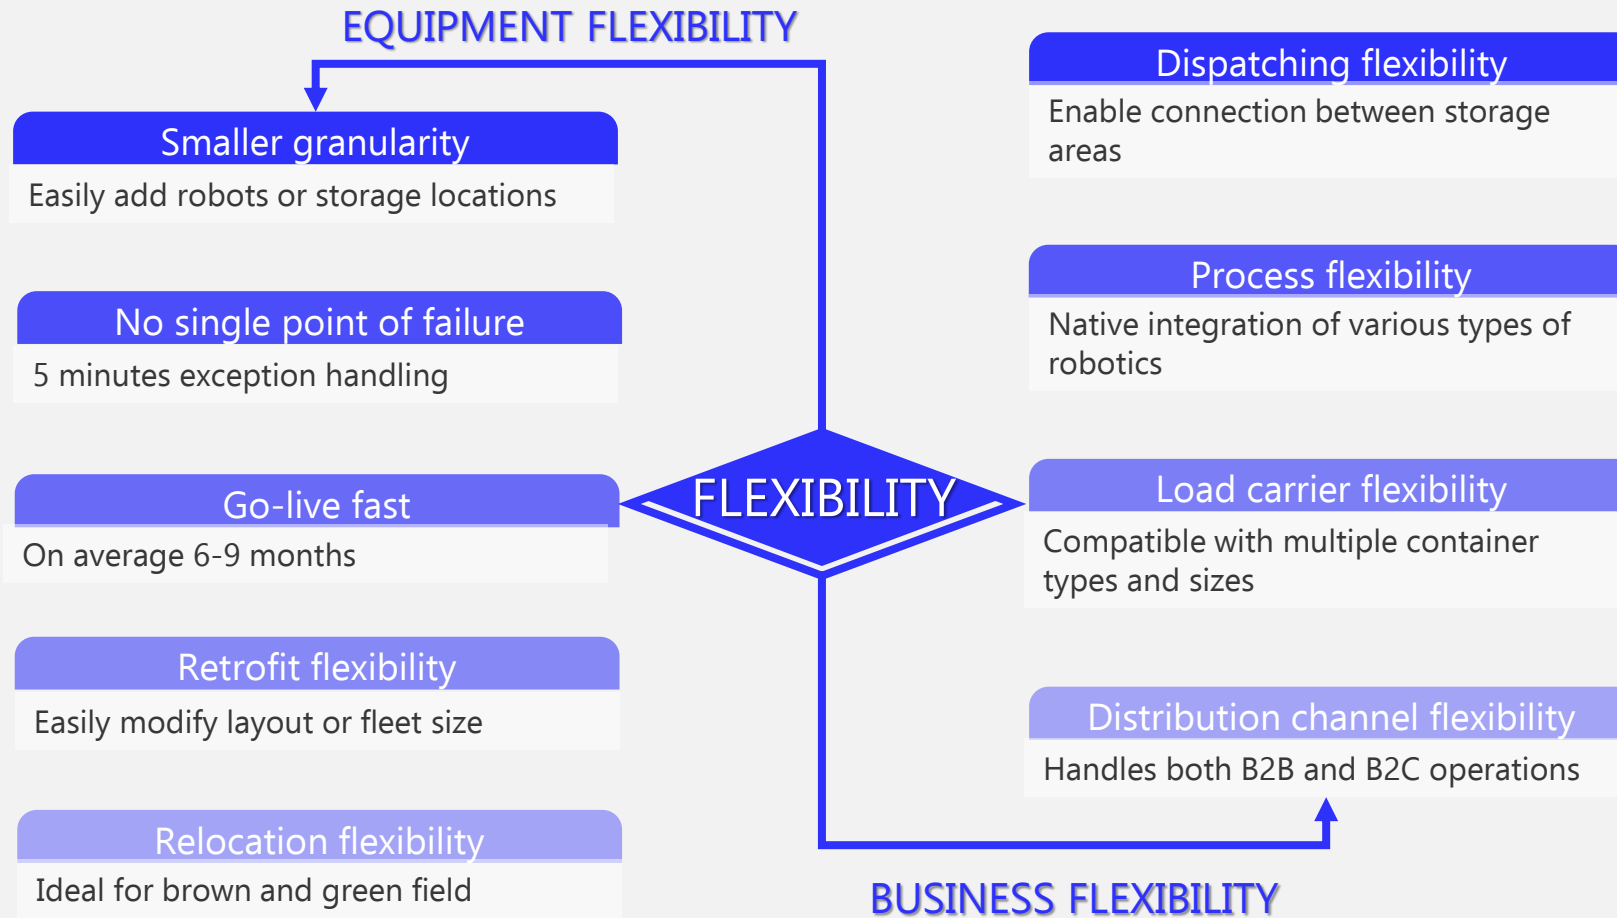

## Higher Storage Density

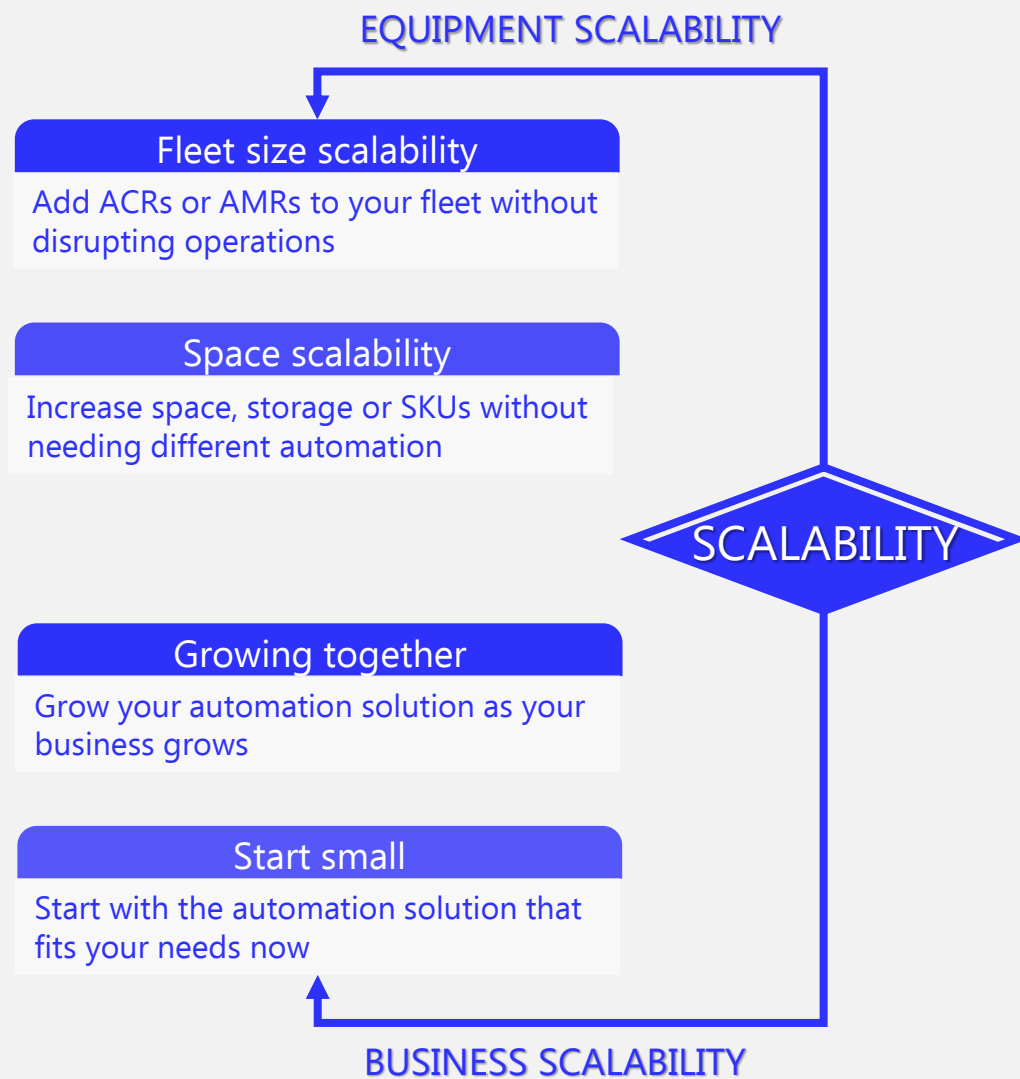

Improve warehouse space utilization above 50 totes per m<sup>2</sup>

# Key Strengths - Flexibility

# Key Strengths – Scalability

# Key Strengths – Industry Expertise

## Grocery

- Suitable for micro-fulfillment centers.
- Operate in chilled and ambient environments.
- Flexibility on order cube.

## Electronics & Manufacturing

- Flexible integration with the manufacturing line.
- Reliable uptime.

## 3PL

- Flexibly handles different size/type of SKU's.
- Easy to expand – growth of business.
- Enables multi-tenant facilities.

## Automotive

- Dedicated solution: A3.
- Flexible integration with the manufacturing line.

## Apparel, Retail & E-Com

- Handling of carton boxes.
- Efficient returns handling.
- B2B & B2C operations supported.

## Pharmaceutical

- Class10000 cleanliness and anti-static:
- Fit for clean and sensitive environments. Dust proof.

Thank you for your attention.

We are on a mission to disrupt the industry. Within proximity to our customer.

Julian Hafner – Senior Director, Global BD,  
3PL & Grocery
