

**TRUST THE WORLD'S  
EASIEST AMR SOLUTION.**

**Agilox**

# About us

- 250 employees
- 1.600 AMRs in the field
- Over 300 customers
- In more than 70 countries
- Locations on three continents and over 20 partners

Performance

# Motivation

- Industry 4.0
- Shortage of skilled workers / population development
- Sick leave
- Vacation
- Failure safety
- Tracking of transports
- Batch tracing
- Cleanliness of production
- More safety / avoid accidents
- Reduction of damaged goods

FOCUS ON VALUE-ADDING ACTIVITIES  
ALLOWS TO OPTIMIZE MATERIAL FLOW

AGILOX

Optimize  
material flow

Provides solutions for  
80% of use cases

AGILOX

# Use cases

CLASSIC PALLET STORAGE

NARROW DRIVING LANES

DOLLY-STATIONS

Agilox

1. Raw material transport
2. Empty loadcarrier handling
3. Pick-to-AMR approach

On-site visit & consulting

Agilox

# Operating area

**VEHICLE DIMENSIONS (L X W X H)**  1.511 x 810 x 1.862 mm

**LOADCARRIER**  EPAL - 1.200 x 800 mm

**MIN. PASSAGE WIDTH** **A** 1.400 mm

**MIN. AISLE WIDTH** **B** 1.600 mm

**MIN. AISLE WIDTH (PARALLEL)** **C** 1.800 mm

**IDEAL AISLE WIDTH** **D** 2.000 mm

**IDEAL AISLE WIDTH (TWO-WAYS)** **E** 2.900 mm

**TURNING CIRCLE** **F** 2.100 mm

**MIN. AISLE WIDTH (TWO-WAYS)** **G** 2.600 mm

**BLOCK STORAGE GAP** **H** 50 mm

**BLOCK STORAGE GAP** **I** 200 mm

**SINGLE STATIONS** **J** 100 mm

AgiloX

As little as possible

Omnidirectional movement

AgiloX

# Flexibility

AgiloX

Important

User first experience

Easy setup

Scalability

AgiloX

# AGV vs. AMR

## AUTONOMOUS GUIDED VEHICLES

- Fixed and static route guidance
- Processes are fixed and difficult to change
- Central fleet manager
- On-site adjustments are not possible without an external connection

## AUTONOMOUS MOBILE ROBOTS

- Flexible route guidance
- Simple modification of processes, layout, stations, transport orders, ...
- Fully automatic obstacle avoidance
- Swarm intelligence
- System can be configured by yourself
- Plug & Perform

**AgiloX**

AMR necessary

Designed to revolutionize the  
logistics industry.

**AgiloX**

A top-down view of a green and black robotic vacuum cleaner positioned on a dark blue tiled floor. The vacuum is surrounded by a large, glowing blue circular sensor field that radiates outwards, indicating its range of motion or detection. The floor tiles are arranged in a grid pattern.

Safety

AGILOX

Higher than the  
normative regulations  
As safe as technically possible

360° safety field  
EN ISO 3691-4 conform

purchasing

Lead time  
**~ 8 - 10 weeks**

Comissioning  
**~ 1 - 2 weeks**

AgiloX

# Interfaces

- Many possibilities with REST API
- IO signals via AGILOX IO Box
- AGILOX is part of the VDA 5050 board
- Handling of mixed fleets is an important use case

# X-Swarm Technology

Dynamic routing & swarm intelligence

AGILOX

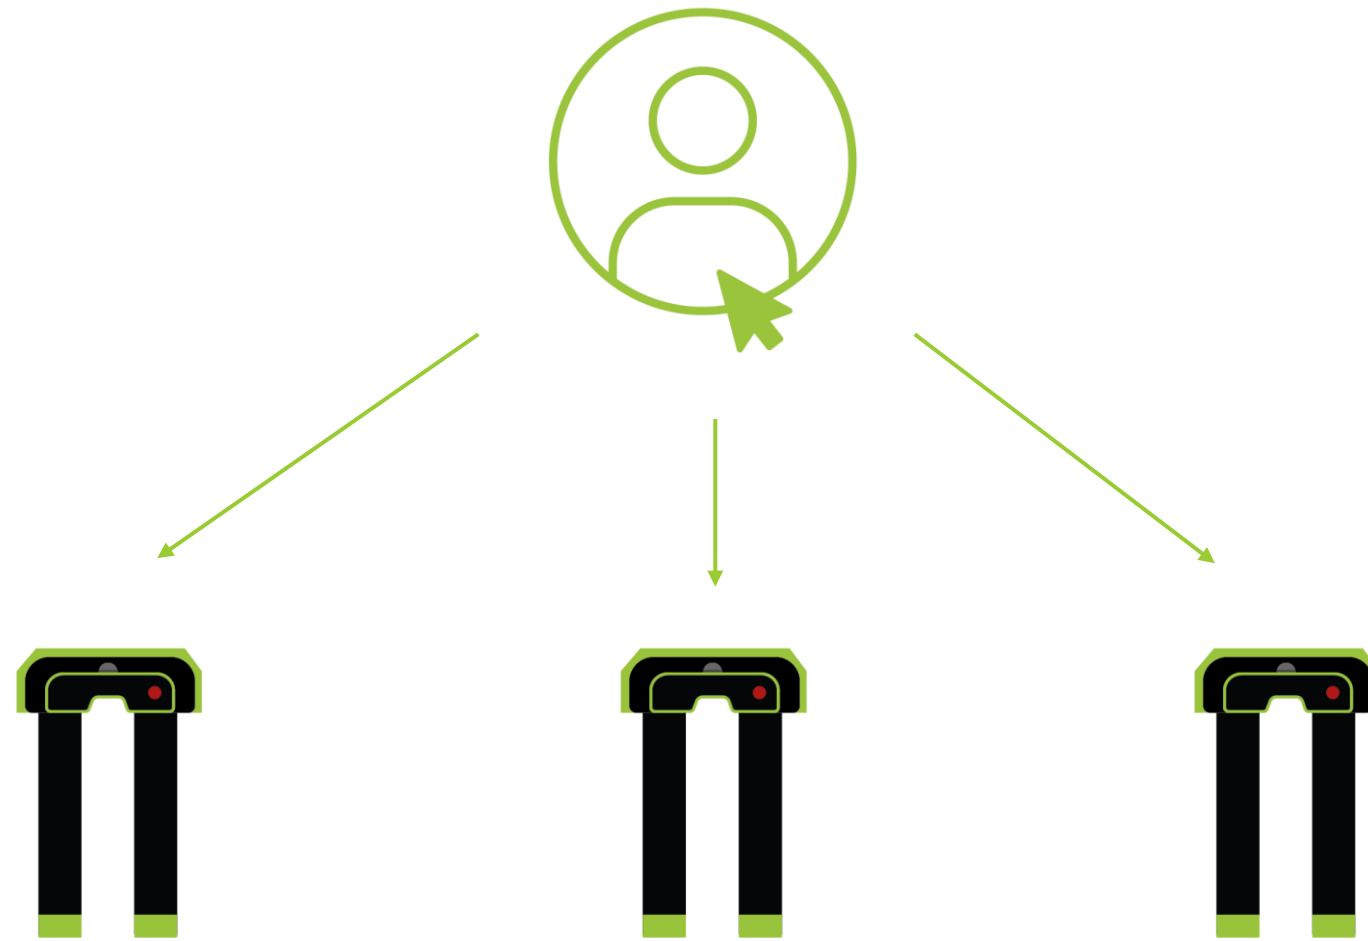

Seamless integration

Different levels of integration  
combinable

AGILOX

# Performance - Decentralized intelligence

Host computer on  
the customer server

# Performance – Centralized intelligence

## Supply Chain

Simply no more standstill. 24/7.

AGILOX

Constant material flow  
under all circumstances

Redundant setup +  
X-Swarm intelligence
